

## **PROPER SHIPPING MARKS**

Messrs. CNAN Nord Spa, Alger stressed out once again the importance of the conventional cargo to be properly marked as minimum with the name/coordinates of the receivers and the port of destination.

Some shippers forget the importance of these marks which are necessary to identify the cargo and to deliver it to the correct destination and receivers.

Any improper shipping marks lead to problems with the Algerian Customs causing a delay of the vessel during the discharge.

Kindly be informed that cargoes that are not properly or insufficient marked cannot be loaded anymore as otherwise such cargo might be subject to a refusal of discharge and then consequently return to the port of loading for shippers account!

Thank you very much for your understanding and attention.
