

PROPER SHIPPING MARKS

Messrs. CNAN Nord Spa, Alger have to stress out again the importance of the conventional cargo to be properly marked with as minimum with the name/coordinates of the receivers and the port of destination.

Some shippers forget the importance of these marks which are necessary to identify the cargo and to deliver it to the correct destination and receivers.

Cargoes that are not properly or insufficient marked, might be subject to refusal of discharge and could be returned to the port of loading for shippers account.
